SUGAR DEVELOPER ACTIVITY UPDATE

Outreach

- Developer Blog
 - developer.sugarcrm.com
- Twitter
 - @sugarcrmdev
- Community
 - community.sugarcrm.com
- Events (such as UnCon)

Dev Automation

- Test Harnesses
 - Unit test suites
 - Performance test framework (Jmeter)
- Tooling
 - Exploring command line tooling
 - Jenkins
 - Sidecar Chrome plug-in is part of UnCon

Developer Portal

- A single reliable source of truth for Sugar information
- Promote best practices
- Exhaustive and complete reference
- Center for engagement on Outreach and Dev Automation
- Articulate the Sugar Platform vision

Help us build the Sugar Developer ecosystem!

- No longer have an open source project as an epicenter of engagement with Sugar 7
- Takes a lot of effort to hire and train new Devs
- ✓ Get involved in Sugar Events (like UnCon)
- ✓ Be active in online communities
- ✓ Go to & Set up Meetups, Webinars, etc.
- ✓ Get Certified!

UNCON LOGISTICS

Roundtables

- Un-conference style – Agenda is up to **YOU**
- We have a potential topics lined up as well as a draft schedule
- **Audience decides what gets added, moved, or removed.**
- Topics assigned a table, a time, a moderator
 - Moderators are responsible for making sure events are recorded in some way so they can be shared later with those who missed the topic

[Link to master agenda on the Developer Blog!](#)

Hackathon

- <https://github.com/sugarcrm/uncon>
- Welcome to work on whatever Sugar 7 or CRM inspired project you want (but we gave you some ideas...)
- Food and Beverages served at Hackathon

LETS GET STARTED!
